LO: To research migration locations of animals

We have looked at different animals and why they migrate.

Today we will look at where they go when they migrate and what the different places are like.

Let's look at some of the different places they go.

I do

We are going to try and research one of the locations that the animals migrate to.

I do

Antarctica

What is the weather like?
What can you see there?
What buildings are there?
Who lives there?
What animals can be found there?
What else can you find out?

You do

North America

Africa

What is the weather like?
What can you see there?
What buildings are there?
Who lives there?
What animals can be found there?
What else can you find out?
