

Monday

Can you count to 20?

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20

Use the number line to help you if you are unsure.

This week we are learning about doubling. When we double we have to add together 2 numbers that are the same.

Example:

The diagram shows two ten-frame blocks, each containing two white circles, representing the number 2. These are followed by a plus sign and an equals sign. To the right of the equals sign is a single ten-frame block containing four white circles, representing the number 4. Below the blocks is the equation $2 + 2 = 4$.

$$2 + 2 = 4$$

$$\text{Double } 2 = 4$$

Can you solve the doubles below?

$$3 + 3 =$$

$$5 + 5 =$$

$$4 + 4 =$$

$$2 + 2 =$$
