- connection
- IP number

LO: to recount what I already know

Let's see what you already know! Answer the following questions, being as technical and detailed as possible.

What is a network?

How does the Internet work?

Be prepared to share your answers!

LO: to recount what I already know

LO: to recount what I already know

A network is two or more computers, or other electronic devices, connected together so that they can exchange data. For example a network allows computers to share files, users to message each other, a whole room of computers to share a single printer, etc.

LO: to recount what I already know

LO: to recount what I already know

Watch the video to find out how the Internet works.
