1) What is 3.2×10?

2) Multiply 1.75 by 10

3) Work out $1\frac{1}{3} + 2\frac{5}{9}$

4) Calculate 1,765 kg + 218 kg

1) What is 3.2×10? 32

2) Multiply 1.75 by 10 17.5

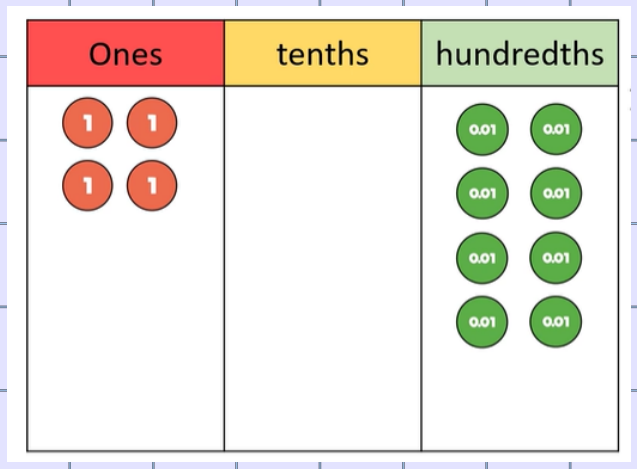

3) Work out $1\frac{1}{3} + 2\frac{5}{9}$ $3\frac{8}{9}$

4) Calculate 1,765 kg + 218 kg 1,983 kg

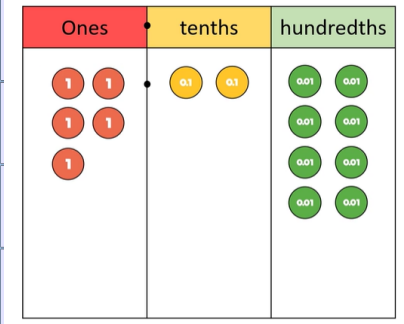

Answers

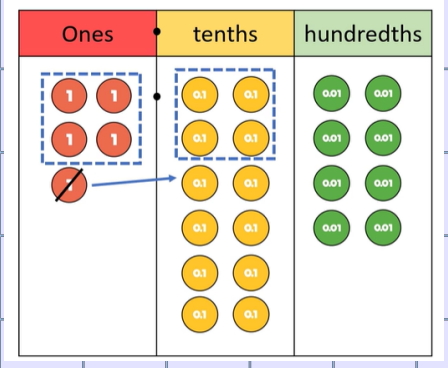

LO: to divide. (Decimals).

$$4 \overline{)4.08}$$

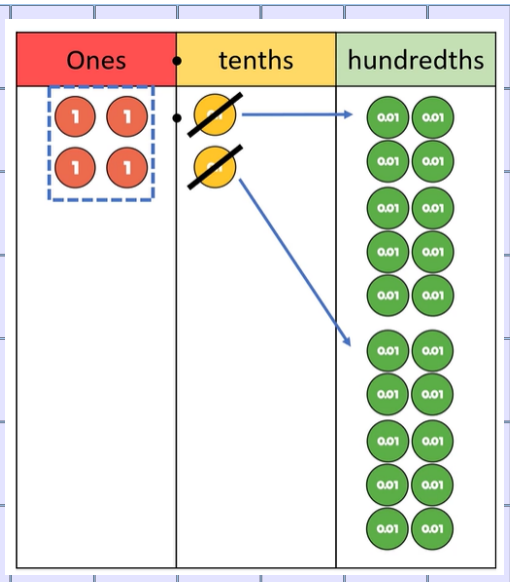

$$4 \overline{)5.28}$$

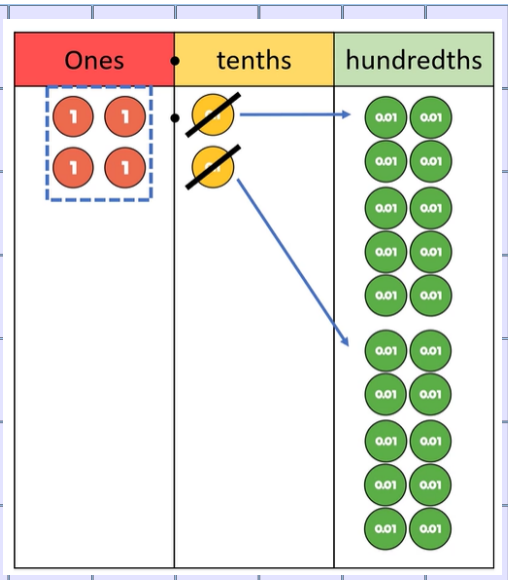

$4\overline{)4.2}$

we do

$$4\overline{)4.2^{2}0}\quad 1.05$$

What did I divide by first?

What did I exchange?

Where did I put my zero? Why?

What is 4.2 the same as?

How many groups of 4 hundredths did we make?

you do
