Good morning Year 6!

Skim the 'Look Out!' text to find the answers to:

1. What do optical illusions use to trick your brain?
2. How does the spooky spiraliser trick your brain?
3. Why is the pulsing picture blurred?
4. What is binocular vision?
5. How many different colours can a human dectect with training?
6. What does it mean to be 'colour blind'?
7. What is the most common type of colour blindness?
8. Which animal has 360 degreen vision?
9. The eyes of which cnimal are made up of 30,000 lenses?

Thursday 15th October 2020

Let's read the text together to answer the questions.

Thursday 15th October 2020

Thinking Together:

Find and copy a word that is slang for your brain.

Look at 'Pulsing Picture'. Find and copy a phrase that is an antonym of stillness.
