Re-cap

you do

$3d + 2 = 32$

$2d - 4 = 22$

LO: to find pair of numbers in an equation.

I do

we do

The circle and the square represent positive integers.

If one circle is worth 4 then the square must be 7

LO: to find pair of numbers in an equation.

I do

we do

What is the same, what is different?

$$2x + y = 13$$

LO: to find pair of numbers in an equation.

I do

we do

x					
$2x$					
y					
$2x + y$					

LO: to find pair of numbers in an equation.

I do

we do

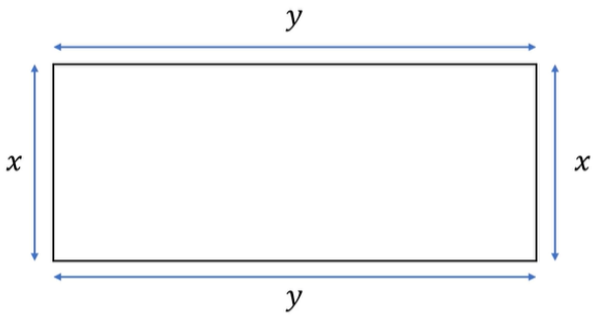
$$4y - t = 3$$

y	1	2	3	4	5
$4y$					
t					
$4y - t$					

LO: to find pair of numbers in an equation.

I do

we do



Perimeter= 22cm

LO: to find pair of numbers in an equation.

I do

we do

a and b are integers.

$$3ab = 60$$

you do

Complete the questions in your book.
