LO: To identify the main parts of the circulatory system using research

Draw an image of the inside of our bodies.

LO: To identify the main parts of the circulatory system using research

we do

Read the text:

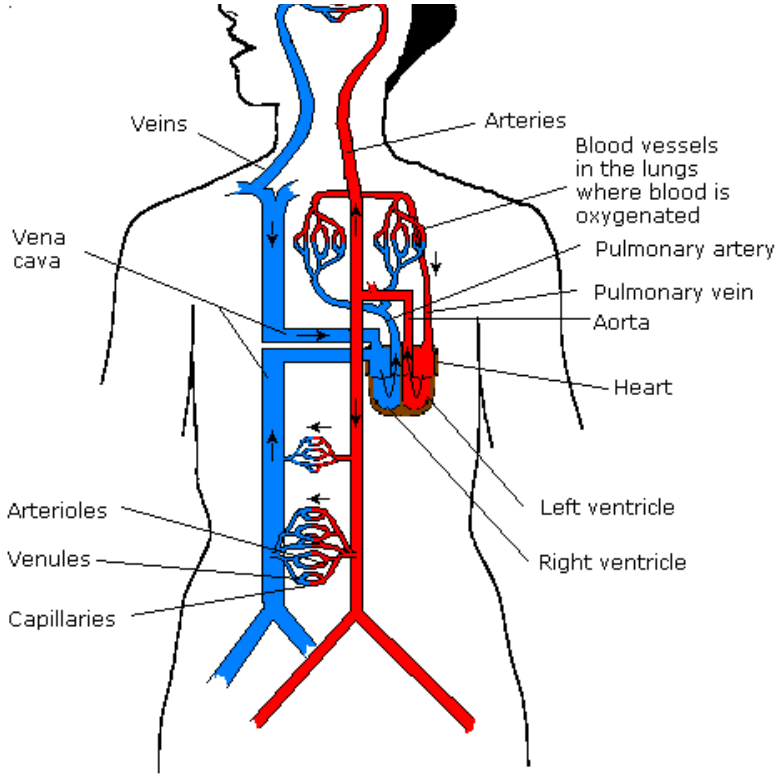

1. What is the circulatory system made up of?
2. What does the heart do?
3. What is the circulatory system responsible for?
4. How big is the heart?
5. How is blood pumped around the body?

LO: To identify the main parts of the circulatory system using research

Answer the questions

you do

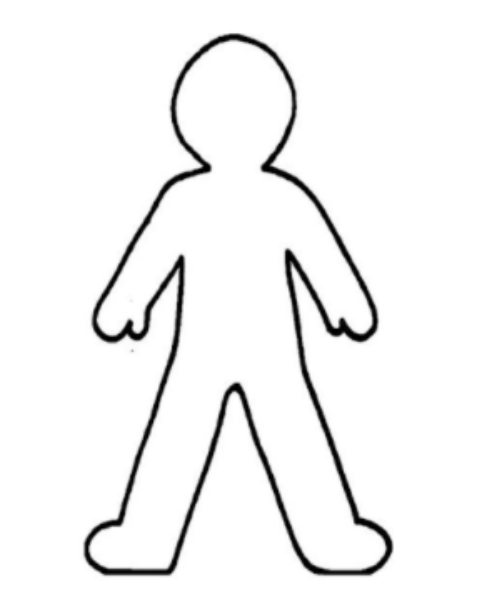

1. What is the circulatory system made up of?
2. What does the heart do?
3. What is the circulatory system responsible for?
4. How big is the heart?
5. How is blood pumped around the body?

Arteries (carry blood away from the heart); veins (carry blood back towards the heart); and capillaries (tiny blood vessels that carry blood to the individual cells - they join the arteries to the veins).

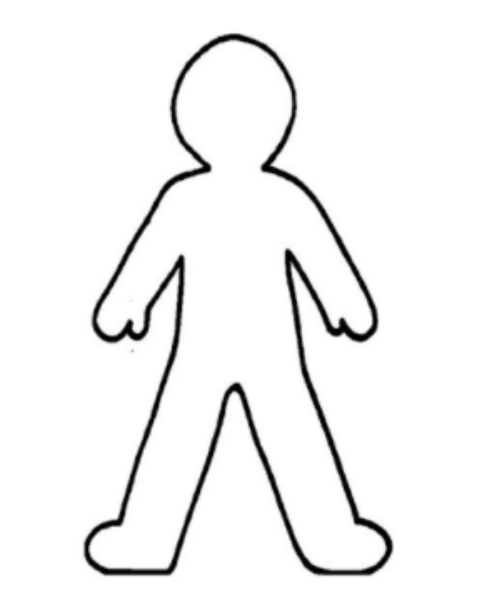

LO: To identify the main parts of the circulatory system using research

I do
