L.O: To calculate area.

I do

True or false? If each square represents 4cm^2 , this shape has an approximate area of 40cm^2 .

Not to scale

We do

True or False? Each square represents 3m^2 . The approximate area of this shape is 22m^2 .

Not to scale

I do

Each square represents 2cm^2 . Draw an irregular shape with an approximate area of 16cm^2 on this grid.

Not to scale

We do

Each square represents 2cm^2 . Draw an irregular shape with an approximate area of 22cm^2 on this grid.

Not to scale

5a. Each square represents 5cm^2 . Tom estimates the shape's area to be 30cm^2 . Is he correct? Explain your answer.

$$6 \times 5 = 30$$
