Shaun Tan has said that he created the Lost Thing by taking inspiration from a mixture of both man-made and natural things. These include an industrial boiler, a dinosaur, a kettle, a crab and an octopus.

Watching the clip, what natural creature (not listed above) inspired the Lost Things mannerisms (personality)?

Can you identify which of Tan's inspiration is man-made and which is natural?

she stock	Engine	Dog
	Children's toys	Fish
