L.O: To identify the correct choice in different situations.

Around the room are 10 different scenarios.

In groups of 2/3, read each scenario and write on the sheet what you should do in that situation.

Let's discuss your answers for each scenario.

1

Drug and Substance Misuse

Your parents gave you some painkillers because you have a sore head but after ten minutes, they haven't worked. You see them still sitting on the table. Should you take more?

2

Drug and Substance Misuse

Your friend brings some cough medicine into school and offers it to anyone who feels they have a cough. What should you do?

3

Drug and Substance Misuse

Your friend is at your house and feels sick. You know you have some medicine that a doctor prescribed you when you were ill.
Is it a good idea to give your friend some?

4

Drug and Substance Misuse

You find a glass bottle that looks like it contains water at the park. Should you taste it to find out what it is?

5

Drug and Substance Misuse

You are at a friend's house and they find some cigarettes. They ask if you want to try one. What do you do?

6

Drug and Substance Misuse

When you are out walking in the woods, you find a bag with white powder in it. It's probably sugar.

What do you do next?

7

Drug and Substance Misuse

A friend's mum gives you an energy drink that your parents have told you that you cannot have because of the amount of caffeine in it. What do you say?

8

Drug and Substance Misuse

A doctor prescribes you antibiotics for two weeks. You feel better after three days and want to stop taking them. What is the best thing to do?

9

Drug and Substance Misuse

A teenager at the park gives you some colourful tablets with a little picture on them. They look exactly like sweets.

What should you do?

10

Drug and Substance Misuse

You are at a family party and someone has left a glass of wine on the table next to you. You see a younger child pick it up and start drinking it.

What do you do?
