Monday:

Find a number of objects and 2 plates.

Put a handful of objects on each plate. Which has more?

Can you say how many objects are on each plate without counting?

We call this estimating.

Tuesday: estimate the number of sweets in each jar, then count to check.

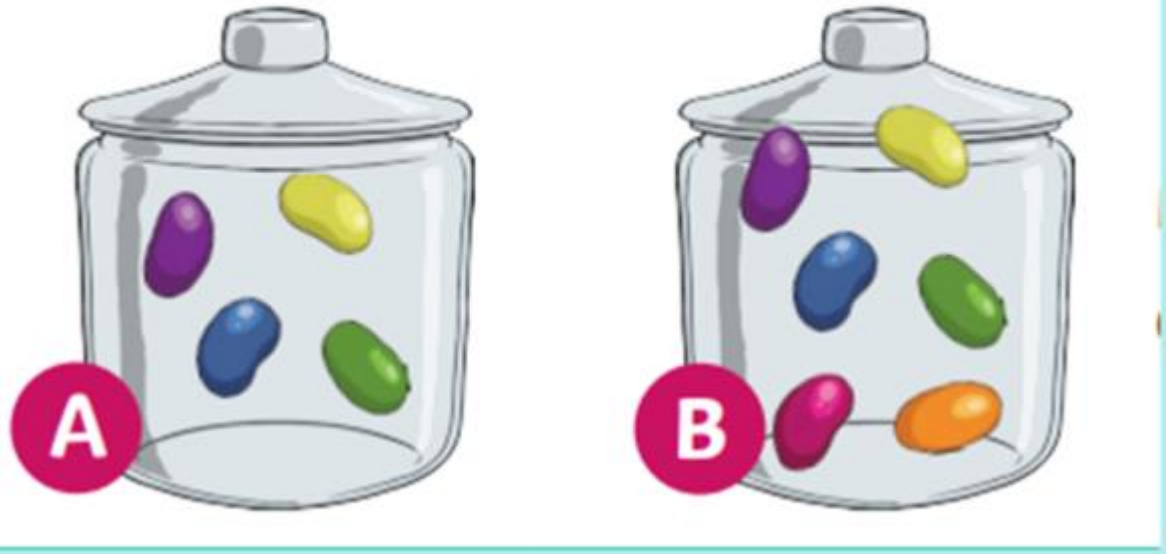

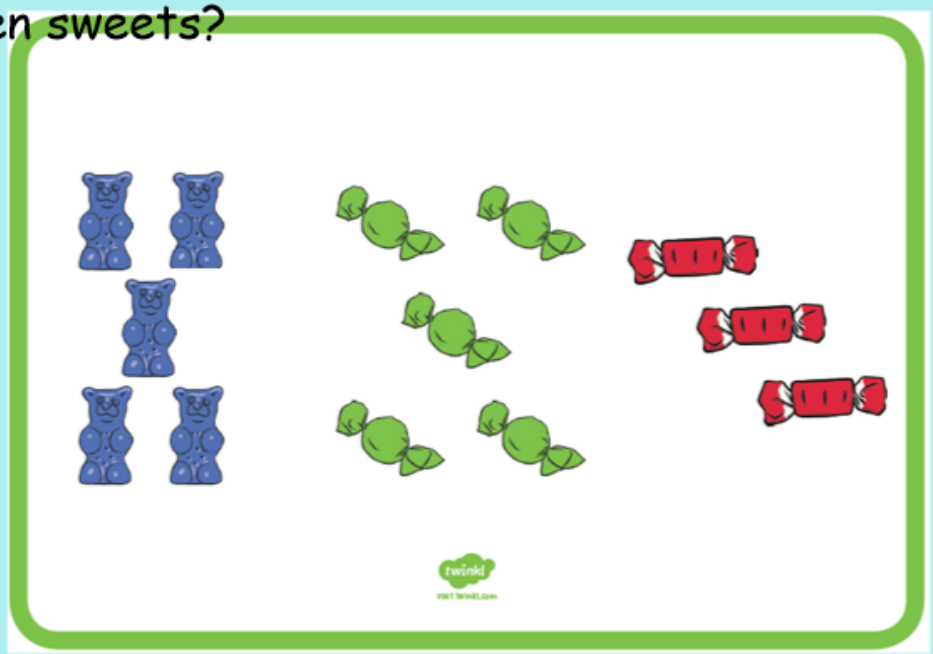

Tuesday:

Which has more? Estimate then check.

Wednesday:

Can you count the objects without moving them?How many blue bears? how many green sweets?

Can you estimate how many red sweets there are?Can you explain the number you chose?

Thursday:

Work with a grown up to guess taking a number of objects from a larger group.

Can you find 10 objects?but DON'T count the objects out, you have to estimate.

Now find 3 objects each? Is it a bigger number of objects or smaller number of objects than 10? Can you explain your answer?

Friday:

Can you play the game to check your estimation?
