L.O: To record information about the Solar System and planets.

<i>True</i>	<i>False</i>	<i>Not sure</i>

The Sun

The Sun is the star at the center of our Solar System. The Sun is fundamental to our life on Earth because it gives us light and warmth.

The Solar System

Our Solar System is a collection of eight planets and their moons that orbit round its star (the Sun), together with smaller bodies in the form of asteroids, meteoroids, and comets. The planets of our solar system are Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, and Neptune.

In pairs read the text, on 'Solar System'

As you read try answering these key questions.

- What is the star of our Solar System?
- Name the Planets and dwarf planets?
- Which is the hottest planet in our Solar System?

*Let's watch a video to understand
the Sun and the Solar System*

What is the Sun?

What is the solar system?

Work with your partners on your table to complete your Planets fact sheet and stick in your book.

Use scientific language to ask for the information you need.
