Play I count, you count!

(Ask a grown up to start counting and they stop for you to continue counting. You can count forward and backwards)

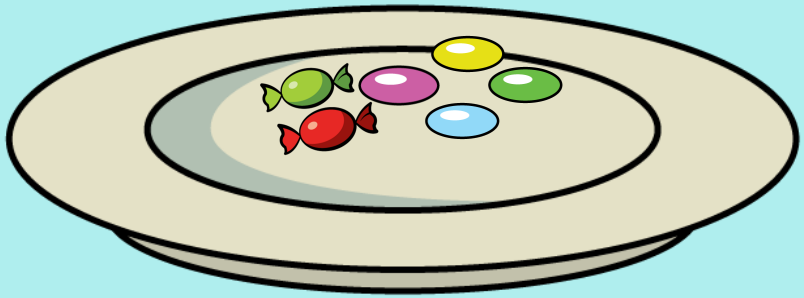

Can you count in 2's?

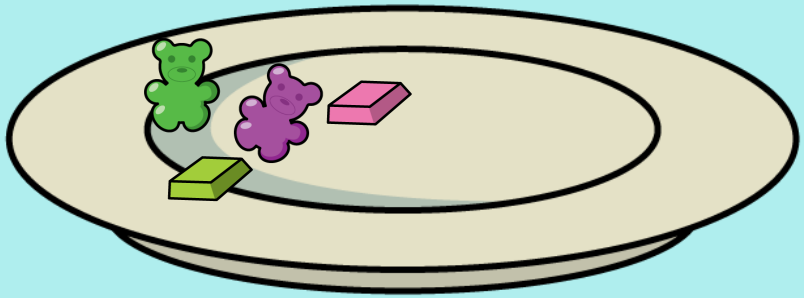

0 2 4 6 8 10 12 14 16 18 20

How many objects are on the plate?

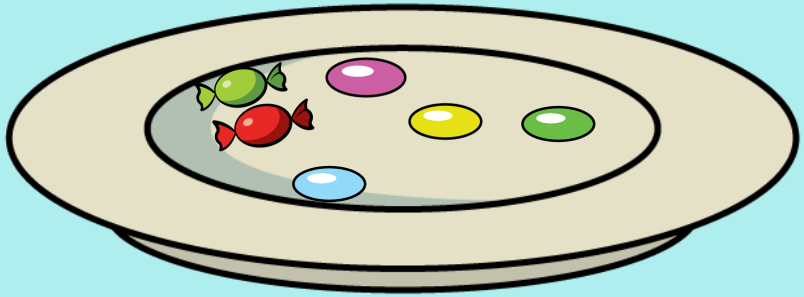

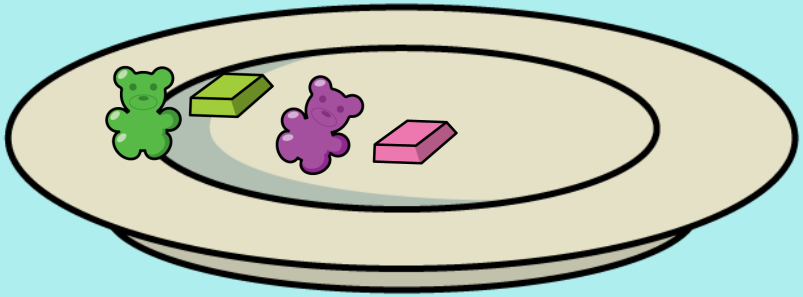

How many objects are on the plate now?

Is it the same as before?

When we count a set of objects, the number always stays the same, even if we spread the objects out.

Practise counting out a set of objects and arranging them differently.
