L.O: To plan.

The ground shakes. The seas swarm with living things but nothing is living on this land. The land folds, buckles as it twists. Little leafless plants grow in damp places because now some things are living on the land. Rain falls on the jagged edges of the rocks.

Worm- like creatures burrow in moss jungles. The current eases the rock through swamps where fish haul themselves out of the water. The river drops the pebble onto the beach. A slab tumbles down a cliff. The surface of the earth begins to rise whereas the layers of rock start lifting above the water.

We are going to write a descriptive paragraph/s to describe this picture.

 https://www.youtube.com/watch?v=Hxbeh-_nNZ0

Listen to a volcano explosion (no picture!) What can you hear?
