I  
do

LO: Identify the processes that occur during a Tsunami

a tsunami is

two tsunamis a year that reach the shoreline

there are usually

small and indestructive

daily tsunamis are

a large ocean wave which can cause devastation if it reaches land

Thursday 8th October 2020

we  
do

LO: Identify the processes that occur during a Tsunami

a tsunami can

can start small but increase in size as it moves towards land

water from the ocean

occur as a result of an earthquake, volcanic eruption or meteorite

a wave

is pushed up and then pulled down, which causes a wave
