LO: To add

Today we will be adding using the column method:

SILENT TEACHER:

345 + 237 = 582

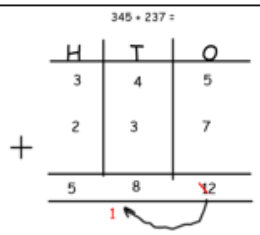

5+7=12 (TENS, ONES)

4+3=7

7+1=8

8+2=5

I DO	WE DO	YOU DO
345 + 237 =  	Why did I add the ones first? why What did I move the 1 ten into the tens column?	456 + 238 =

You do:

Sentence stem.....

To add 456 to 238, I first.....

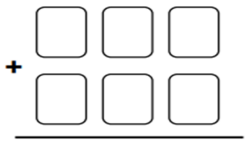

Task:

Use the column method to answer the first question:
267 + 317 =
Use the answer to this question to help you answer the next questions.
277 + 317 =
277 + 417 =
377 + 317 =

Use the column method to answer the first question:
422 + 347 =
Use the answer to this question to help you answer the next questions.
422 + 348 =
422 + 447 =
412 + 347 =

Challenge:

5a. Use any digit card from 0 – 9 to create an addition with 1 exchange. You may only use each digit once in any calculation. Your answer must be greater than 632 and less than 698.

Is there more than one possible answer?
