LO: To problem solve

Starter:

- 254 - 29 =
- 633 - 46 =

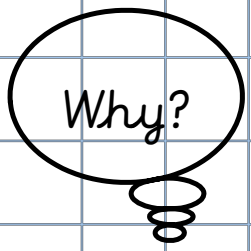

Which of these calculations would you use column method for?

452 - 84

327 - 6

132 - 20

587 - 92

Fill in the missing numbers in the calculation below:

	H	T	O
	□	4	4
−		2	□
	2	1	7

Explain why you chose these numbers.

Mary used the column method to work out

563-82.

She gets the answer 521. She is incorrect.

What did she do wrong?

Josh is thinking of a three digit number.

It has 5 ones.

He subtracts a 2 digit number and gets the answer 18.

What are the subtraction calculations he could be doing?

Find all possibilities using the column subtraction method.
