LO: To subtract

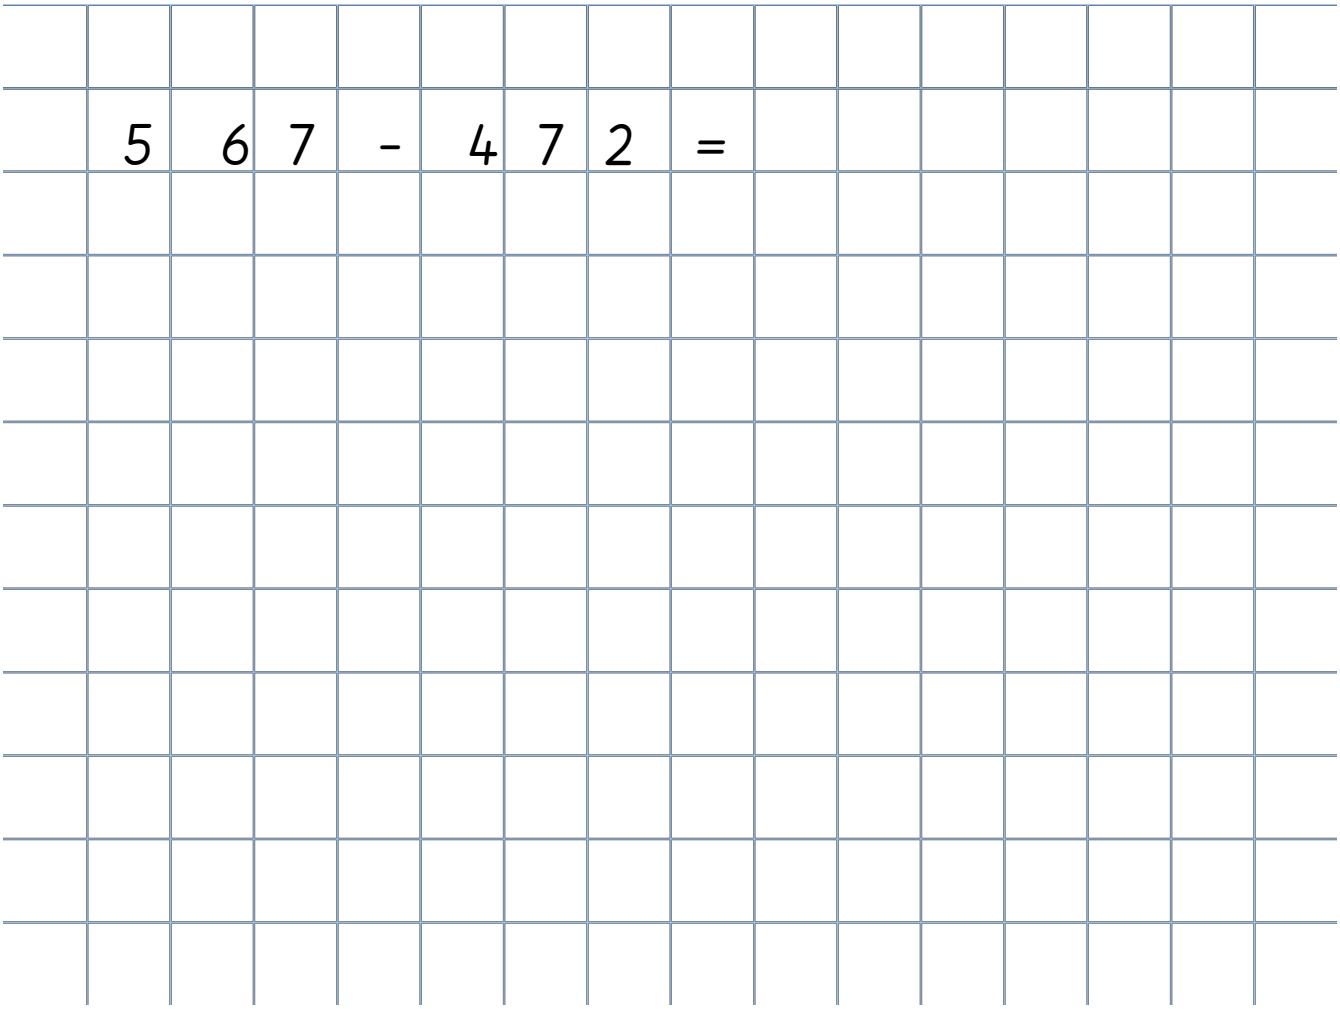

Starter:

- 254 - 22 =
- 633 - 67 =
- 957 - 91 =

Do you remember how we use column method for subtraction?

Remember, sometimes, when we use column method for subtraction, we need to exchange a ten for 10 ones.

443 - 289 =

567 - 472 =

1. 445 - 295

2. 353 - 374

3. 486 - 287

4. 772 - 541

5. 357 - 292

6. 467 - 185

7. 558 - 493

8. 989 - 952

Challenge:

Asha is subtracting 398 from 526.

To find the answer, I add two to 398 to get 400. Then, I subtract 2 again with I have done 526 - 400.

Can you explain Asha's error?

Challenge:

Always, Sometimes, or Never True?

When you use a different method to subtract, you will achieve a different answer.
