I do	We do	You do
Can you make 20p using the least coins possible? To make 20 pence using the least coins possible, I should just use one 20 pence coin.	Why didn't I choose 10p and 10p? Why didn't I choose 10p 5p 2p 1p 1p? Which set of coins would be the next least amount of coins to make 20p? Did any set of coins not equal 20p?	**Make 50p using the least amount of coins possible (not including a 50p coin!)**
