## Challenge:

Alex

$$306 + 300 = 906 - 300$$

Is she correct?

Explain how you know.

# Challenge:

Complete the scenarios so they match the bar model.

Ron has \_\_\_\_ altogether.  
He spends \_\_\_\_ and has £476 pounds left.

Jack has \_\_\_\_  
Eva has £200  
They have \_\_\_\_ altogether.

Amir has £200 more than Rosie.  
Amir has \_\_\_\_  
Rosie has \_\_\_\_

Draw your own bar model where one of the parts is a multiple of 100  
Write scenarios to match the bar model.
