LO: To compare fractions

Starter:

Today can you find the missing number using the inverse?

$$\underline{\hspace{2cm}} - 245 = 148$$

Share and praise

Today we are going to be comparing fractions using the symbols
 $<$ $>$ $=$ and answering reasoning questions.

Investigate the following questions!

Mariam says, "When I compare unit fractions,
I just look at the number at the bottom of
the fraction, the denominator, and that tells
me which is smaller."

Ruby has drawn 4 rectangles of the same size. How could she divide and shade the rectangles to show how to order some unit fractions from smallest to largest?

Mohammed says, "When I compare fractions with the same denominator, I look at the numerator."

Mariam has drawn 4 circles of the same size.
How could she divide and shade the circles to show how to
order some fractions with the same denominator from
smallest to largest?
