

Starter

Where do Amphibians live?

Name an Amphibian.

Which animal groups have we looked at so far?

Today we are going to learn about a new animal group.

Let's watch a video all about birds

 <https://www.youtube.com/watch?v=jF0ld-hH9y4>

First read - with partner

Birds belong to the group of animals called **vertebrates** which means they have a backbone have a backbone. Birds have feathers on their body and wings which help them to fly. They have a pointed beak which helps them to eat. They eat different foods such as fruit, plants, seeds and other small animals. Birds have no teeth so they swallow their food whole. Birds lay egg which they keep in a nest to keep warm until they are ready to hatch. They are warm blooded.
