Starter- Look back in your book to help you.

What is the capital city of England?

What is the capital city of Scotland?

What is the capital city of Northern Ireland?

What is the capital city of Wales?

LO: To use the text to sort statements about rivers into true or false.

What do you know about rivers?

Lets watch the video to learn more about rivers.

https://www.bbc.co.uk/teach/class-clips-video/geography-ks1--ks2-rivers/z6qsf4j

Lets Read:

Most rivers begin on high ground, like on mountains or hills. The start of a river is called the source. Small streams form and gradually get bigger as they collect more water from the rain and join other streams. Slowly it collects enough water to be called a river. It then usually ends at the sea.

The bottom of a river is called the bed and the sides are called banks. Rivers help a lot of plants to grow and provide food for fish and other animals.

You have to be very careful when near a river. If you fall in, you can be carried away downstream by the strong current. This is when the river pulls away under the surface of the water. It is very dangerous.

Second Read

1. Where do most rivers begin?
2. Where do most rivers end?
3. What is the bottom of a river called?
4. What are the sides of the river called?

True or False.

Most rivers begin on low ground.

You do: cut out the sentences and sort them into true or False.

True	False

The start of the river is called the source.	Most rivers begin on low ground.
Rivers help lots of plants grow.	The sides of a river are called banks.
Most rivers end up at the sea.	The bottom of the river is called the stream.

Challenge

Explain why they are false.

It is false because the correct answer is __.
