All about Summer

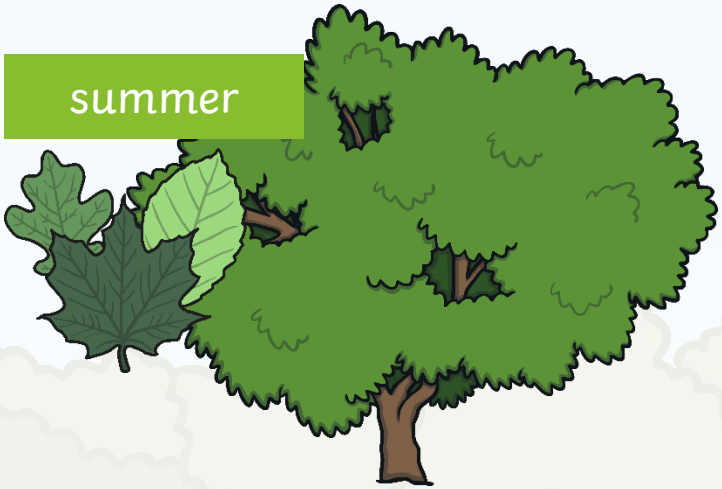

Summer

Summer is one of the four seasons. It comes after spring and before autumn.

Months and Seasons

The summer months are June, July and August.

With a partner, look at the seasons wheel.

- Can you name the winter months?
- If the month is June, what season is it?
- If the month is January, how many months are there until summer begins?

Lighter Evenings

You might notice that the daylight lasts longest during the summer months. It may still be light when you go to bed!

Month	Sept	Oct	Nov	Dec	Jan	Feb	Mar	April	May	June	July	Aug
Hours of sunlight	13	11	9	8	8	10	12	14	15	16	16	14

Summer around the World

Summer falls in different months of the year, depending on where you are in the world.
The UK (United Kingdom) is in the **northern hemisphere** of the earth. The bottom half is called the **southern hemisphere**. The two hemispheres are split by an imaginary line called the equator. The closer you are to the equator, the hotter the temperature.

twinkl.com

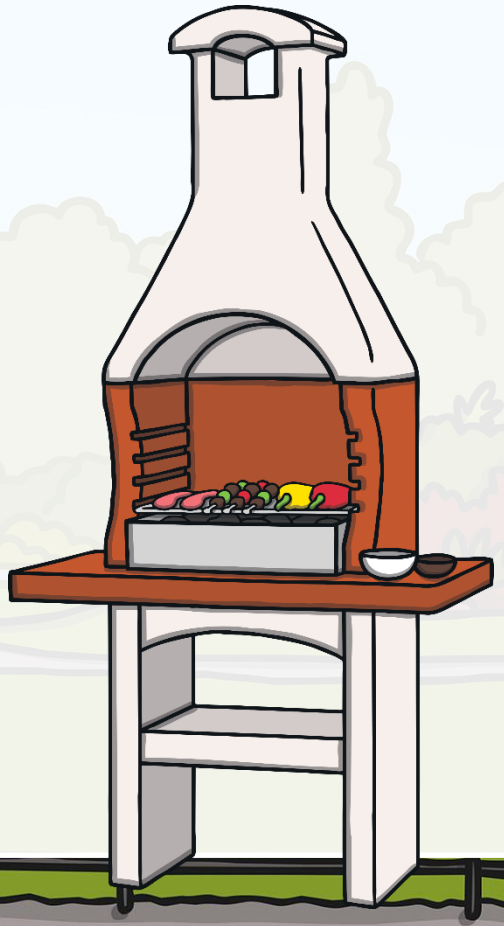

Summer around the World

Winter in the **southern hemisphere** is at the same time as summer in the **northern hemisphere**. So, in countries like Australia, summer is in December, January and February!

winter – June, July, August
spring - September, October and November
summer – December, January, February
autumn – March, April, May

That means that Australia's Christmas Day is in summer, the hottest part of the year!

Christmas dinner here is often a cold meal or a barbeque with seafood, such as prawns.
