L.O. To create an algorithm and debug a program

we are going to play a game on the ipads use ths link or QR code

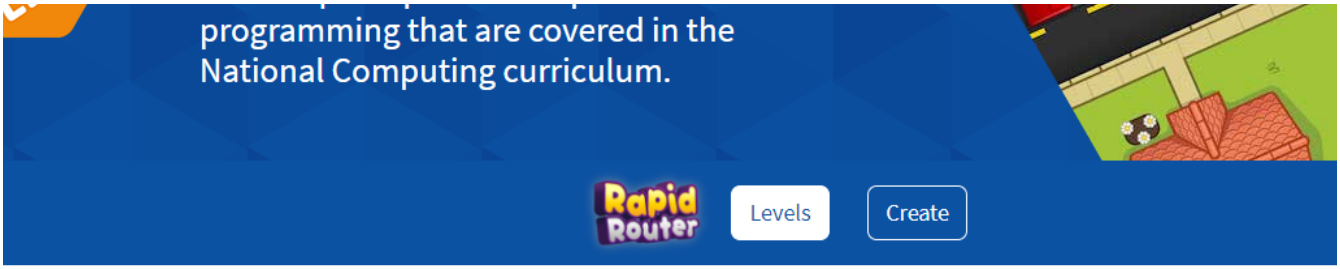

https://www.codeforlife.education/rapidrouter/

We are going to do the get started levels 1-12

click

Levels

Getting Started

1: Can you help the van get to the house?

2: This time the house is further away

3: Can you make the van turn right?

4: You are getting good at this! Let's try turning left

We are going to start with this. click

Level 1

Can you help the van get to the house?

Choose the right blocks to tell the van where to go.
Drag the blocks under the **Start** block to attach them.
To remove a block, drag it into the bin in the bottom right of the screen.
When you are happy with your sequence, press !

You are not logged in. Your progress won't be saved.

Play

This is the screen you will get don't worry about not being logged on!

Now try and play!

If you complete a level have a go at the next!

How far can you go!
