Talk to your partner

Can you name the 5 different animal groups?

Starter

In your books

Can you write 2 facts about mammals that we learnt in our last lesson.

Today we are going to look at another one of the animal groups.

Lets watch a video all about an animal group

https://www.bbc.co.uk/bitesize/topics/z6882hv/articles/zc6br82

Which animal group are we going to look at today?

Amphibians

First read - Read the text with your partner

There are more than 4000 types of Amphibians. Amphibians have a backbone. They are **cold-blooded**, which means their body temperature is the same as the place they are in. Amphibians have **smooth, slimy skin**. They can breathe through their skin. They live on land first and then on water. Amphibians have gills to help them breathe in water. They also have fins to help them swim. Later in their life, their body change. They grow legs and lungs which help them to live on the land. The word amphibian means 2 lives, one in water and one on land. A frog is an Amphibian.
