Friday

Can You Share the Balls Out?
Share the balls out between the children.

Create yourself a number track like the one shown below.

Play this game:

Roll a dice. If you roll a 1,2,3,4,5 then move this number of places. If you roll a 6 then go back to the start. The first person to 20 is the winner.

Consider: How many more do you need to win? Who is the closest to winning?
