15.06.21

LO: To identify fractions greater than 1 whole

Success Steps

I know a fraction is an equal part of an amount or a shape.

I know the numerator represents the fraction.

I know the denominator represents the whole.
I know that when the numerator and the denominator are the same number, the fraction is equal to one whole.
I know that if the numerator is greater than the denominator than the fraction is greater than one whole.

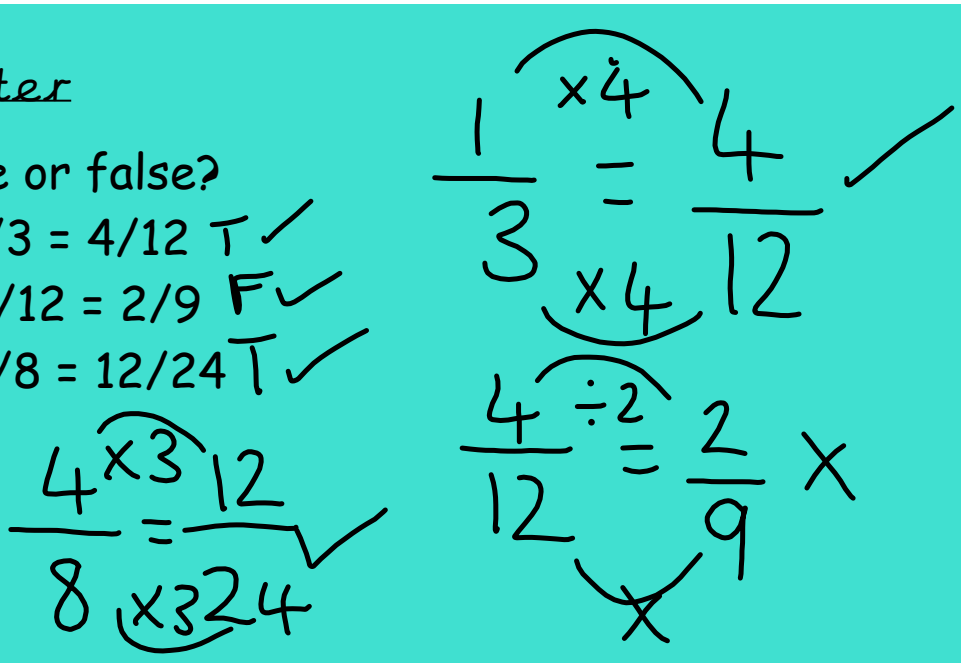

Starter

True or false?

a) 1/3 = 4/12 T

b) 4/12 = 2/9 F

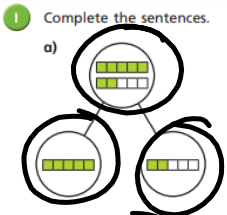

c) 4/8 = 12/24 T

Silent teacher

1 Complete the sentences.

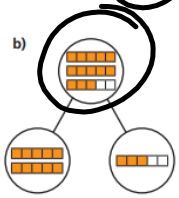

a)

There are 7 fifths altogether.

7 fifths = 1 whole + 2 fifths

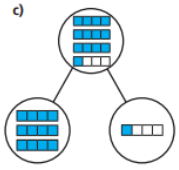

b)

There are 13 fifths altogether.

13 fifths = 2 wholes + 3 fifths
