Friday 19th March

LO: To explain why certain features are essential for the building of a village.

Starter

Look at the following features.
Which ones are human and which are physical?
Canal
River
Park
Woods
Mill
Church

Write sentences about the human and physical features of Saltaire using conjunctions.

Read the text and answer the questions.

Why did the way people travel change?
What was travel like before the Industrial Revolution?
How was the problem of travelling upstream solved?
How long is the Leeds Liverpool Canal?
Which part of the countryside does the canal pass through?
Why were railways a great improvement to travel?

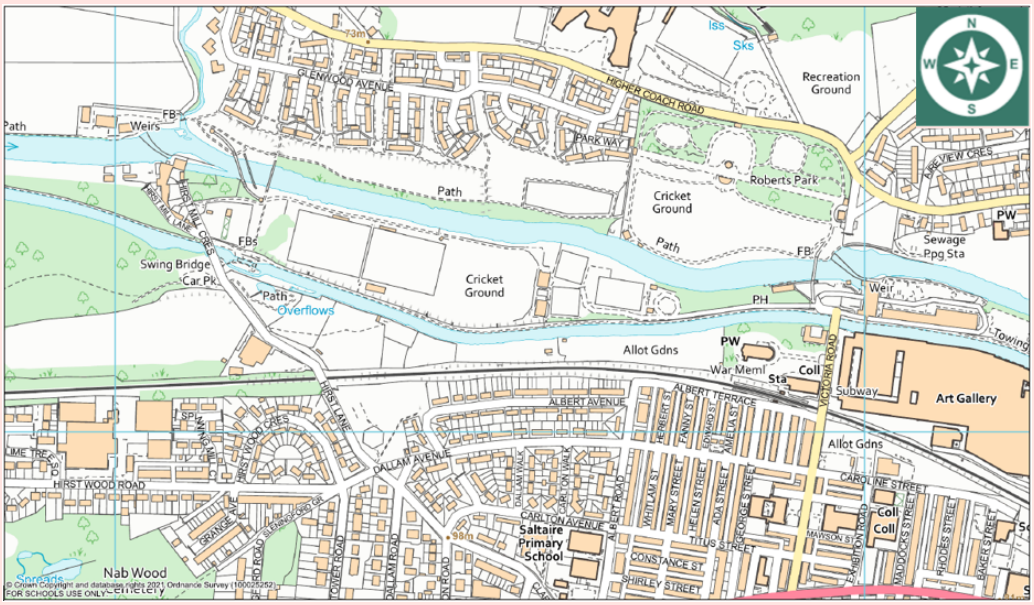

Put your answers on post-it-notes.

Put the answers in the correct order.

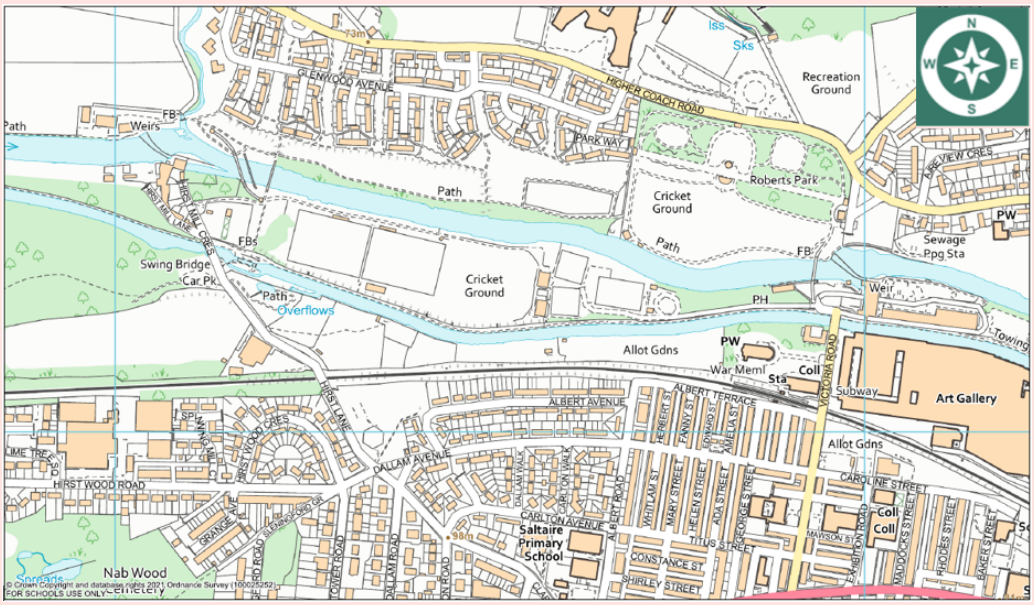

Look at a map of Saltaire.

Why is Saltaire situated here?

What makes it a suitable locality?

I do

Write a paragraph to explain why certain features are essential for the building of a village (Saltaire).

The Victorian village of Saltaire was built next to the river Aire which provide recreation for Salt's mill workers and their families. The mill was built next to the river so that textile goods could be transported easily. The canal, a human feature, was another way of transporting goods in a more efficient way. The towpath that runs along the side of the canal was used by the horses to pull the barges. In 1885 when steam was invented, the railway provided a quicker mode of transport.

We do

Write a paragraph to explain how the geographical features are used today.

You do

Write a paragraph to explain why certain features are essential for the building of a village (Saltaire) and how these features are used today.
