Read the text 'The Coppergate Dig'

https://www.jorvikvikingcentre.co.uk/about/jorvik-story/coppergate-dig/

Oct 3-07:11

1. What year did the Vikings capture York?

2. Who took over from the Vikings in 1066AD?

3. How many years did the Vikings trade in York?

Oct 3-07:11

Choose the best group of words to fit the passage and put a ring around your choice.

The only archaeological finds (up to the 1970's) from the Viking Age were items:

Found by children	Found by adults using a metal detector	Dug up by chance	Discovered by people digging in their allotments

Name three things which were found on the archaeological site in York.

True or false? Tick which statements are true and which are false.

Statement	True	False
The Coppergate Dig took three years to complete.		
In May 1976, rare traces of Viking Age timber buildings were revealed.		
In the Coppergate Dig, it was discovered that there is up to 9m of archaeological layers (mostly dating back to the Viking Age).		
The Romans re-used tiles from the Viking Age.		

Give three reasons why the moisty peaty archaeological layers, which were discovered in York, was a great find.
