Lo: To read Roman Numerals

Success Steps

I can identify the five symbols used in Roman Numerals.

I know that when the big number goes before a smaller number you add them together.
I know that when a big number goes after the smaller number you subtract the smaller number from the bigger number.

(Share ppt)

Straw activity: Say a number and make it using the straws.

Aug 28-19:35

Convert these numbers

18 = XVIII
10 5 3

XV = 15

XXVII = 27

45 = XLV
10 50

I	1
V	5
X	10
L	50

Aug 28-19:35

Numerals	Words	Roman numerals
23	twenty three	XXIII
67	sixty-seven	LXVII
55	fifty five	LV
81	eighty-one	LXXXI

XXII > VI

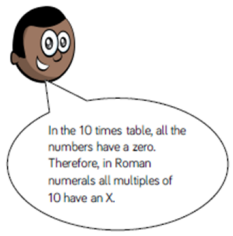

34 > 24

Use these Roman numerals to write 3 more than statements.

XCII 92	XXXVI 36
LXXIX 79	XLIV 44

XCII > XXXVI

Bobby says:

Research and give examples to prove whether or not Bobby is correct

Are these statements always, sometimes or never true?

1. *A number starting with X is bigger than a number starting with V.*
2. *A number starting with L is smaller than a number starting with X.*
3. *Numbers greater than 10 have more than one letter in them.*

Solve the following calculation:

XIV + XXXVI = ☐

How many other calculations, using Roman numerals, can you write to get the same total?
